https://github.com/muratcan-yuksel/skyneb-app

**Mathimals**

A game done by an international group of coders that strives to teach kids some basic math, animal names, and spelling. In the front-end Vanilla JS is used. For the back-end, we chose Google Firestore. First 5 fastest typers are shown on the best scores list. The game is made for The Odin Project's 1st game-jam.

https://github.com/muratcan-yuksel/Mathimals

**E-Commerce Website-Existential Comics T-shirts**

An e-commerce website

Tech used:

React router

React Bootstrap

React Context API

https://dreamy-saha-641e2a.netlify.app/
https://github.com/muratcan-yuksel/shopping-cart-react

**Philosopher Card Game**

A memory game featuring various philosophers

The user needs to choose a different philosopher each time.

Failing to do so will start the game all over.

Tech stack=> React hooks, Bootstrap 5
